CZARNIKOW

Czarnikow Ingredients & Packaging

Driving change, delivering advantage.

We use our global network and sourcing expertise to aggregate, develop and manage the most sustainable and cost effective movements of ingredients and packaging for producers, processors and industrial buyers.

THE CZARNIKOW DIFFERENCE

OUR PEOPLE

The quality of our people is fundamental to our ability to stay innovative, flexible and creative in our changing marketplaces.

OUR CLIENT RELATIONSHIPS

Integral to our high client service ethos is our willingness to invest in long-term client relationships and solution-driven services.

OUR MARKET KNOWLEDGE

Our global presence, market-leading analysis, and bespoke advice enhances our ability to meet client needs, often in challenging markets.

OUR VALUES AND INTEGRITY

We are recognised as a trusted and dependable partner, underpinned by our core values and high ethical standards.

OUR COMPANY

Over 150 years' experience in supplying products across the world.

578 companies

SUPPLIES
260 manufacturers

MOVES OVER
70k containers

LOADS
12k railcars

LOADS
63k trucks

WHO DO WE WORK WITH?

PRODUCERS & PROCESSORS

We work with key producers and suppliers of ingredients and packaging worldwide.

LOGISTICS

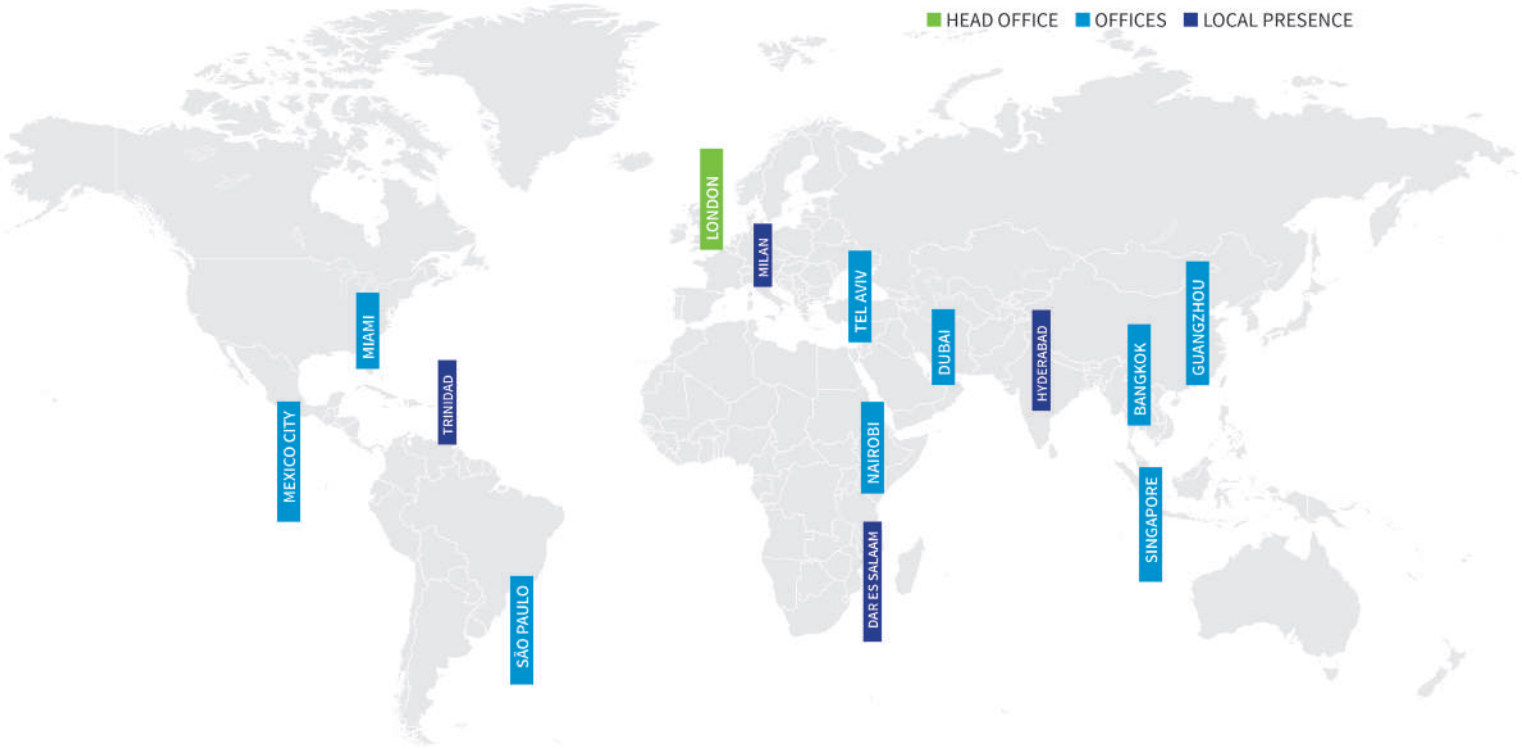
Czarnikow partners with a range of logistics, freight and shipping providers, giving true global scale and reach.

INDUSTRIALS

Czarnikow works with the leading consumers of ingredients and packaging globally, ranging from small industrials to global multinationals.

SUSTAINABILITY

Czarnikow interacts with individuals and organisations right across the supply chain through our Sustainability Programme, Vive.



CZARNIKOW

COMPLETE INGREDIENTS SUPPLY CHAIN MANAGEMENT

Czarnikow offers a fully transparent service. This unique approach fosters trust between Czarnikow and our clients and helps to unlock productivity improvements.

MARKET ANALYSIS

Our world leading analysis and advisory department ensures our clients receive the most up to date and relevant information. The often opaque nature of the ingredients and packaging markets means there is significant value in providing high quality market analysis and subsequent price discovery.

RISK MANAGEMENT

Czarnikow's Risk Management services are tailor-made to suit the requirements of our clients, which ensures we are constantly managing risk in an optimal manner.

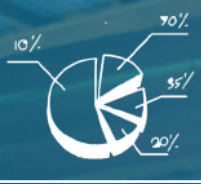
PHYSICAL SOURCING

Czarnikow's transparent supply chains, underpinned by a foundation of strong relationships and creativity, allows us to deliver on the quality, timing and productivity needs of both producers and end users.

INTERNATIONAL FREIGHT LEVERAGE & FLEXIBILITY

Czarnikow moves over 70,000 container loads annually. This gives substantial leverage with shipping lines, ensuring that we are not only amongst the most competitive buyers of freight globally, but that the service we receive is second to none. Czarnikow uses this global freight platform to ensure that we are at the forefront of freight optimisation and innovation in an ever-changing world.

LOGISTICS & STOCK MANAGEMENT



Czarnikow's ability to aggregate destination volume coupled with our expertise of in-land logistics, clearing and warehousing combines to open up global supply options to our clients on an efficient Just In Time basis.

FINANCING AND CREDIT

Extended and flexible financing solutions are offered by Czarnikow to our clients. Prepayment is available to producers and processors, and credit can be offered up to 180 days from invoice date to our industrial buyers, allowing our clients to manage their cash flows in an optimal manner.

VIVE

A continuous improvement programme for ingredient supply chains that enables sustainability performance to be measured, and improvement objectives to be set and monitored. Our focus is not just upon improving sustainable performance across the supply chain, but also using Vive to create tangible commercial value for our participants.

Czarnikow is integrated into our clients' supply chains, allowing us to create value at every stage, whether it be sourcing improvements, risk management, financing, optimising freight, cutting out unnecessary cost or enhancing service.
